## Java Full Stack Dev

### Experience

#### Java FSD Trainer Assistant (1-sep-2025, 6-nov-25) in LTMindtree

- Conducted hands-on sessions on Java, Spring Boot, Angular, TypeScript, and MySQL.
- Mentored trainees in coding, debugging, and project implementation.
- Reviewed assignments and provided technical feedback for improvement.
- Prepared daily progress reports for management review

#### Java Trainer 2 Year (11-may -2023 , 18 Jun -2025) in iMate Foundation (StartUp)

- Trained students in Core & Advanced Java with hands-on coding sessions.
- Delivered structured lessons on OOPs, Collections, Exception Handling, and Multithreading.
- Mentored learners in project building and real-world Java application development.
- Guided students on clean code, debugging, and best programming practices.
- Helped batches gain strong Java fundamentals and interview readiness.

### Projects

#### Frontend :

[Github](#)

[Leet Code](#)

[LIVE Project](#)

#### VirtualR x Developer - Reactjs ,TypeScript, TailwindCss,Redux,Git ,Reponsive Design

- Designed and developed a modern ReactJS application with a focus on clean UI/UX and responsive design.
- Implemented state management using Redux for efficient and scalable data handling.
- Utilized Tailwind CSS to build elegant, consistent, and mobile-friendly interfaces.
- Developed the project using TypeScript to ensure strong type safety and maintainable code.
- Followed best practices for component reusability, folder structure, and performance optimization

#### Real Life Student Tracking App, Angular Spring Boot Mysql Java 8

[Github](#)

- Engineered a full-stack task manager using Spring Boot (RESTful API) and Angular (SPA), demonstrating end-to-end development expertise.
- Secured all endpoints via Spring Security and enabled scalable data management using Spring Data JPA for robust task CRUD operations.
- Delivered enhanced user accountability and retention by developing a proactive deadline notification service and an intuitive Angular interface.

#### Backend:

[GITHUB](#)

#### Real Life Ecommerce App | Java, Spring Boot ,RestApi ,Mongodb, Spring Security ,Maven ,MicroServices|

- Developed a microservices-based e-commerce backend application using Spring Boot and Spring Cloud.
- Built independent services for Inventory, Product, and Order Management, ensuring modular and scalable architecture.
- Implemented API Gateway for centralized routing and request handling across services.
- Configured Spring Cloud Discovery Server (Eureka) for dynamic service registration and inter-service communication.
- Designed and consumed RESTful APIs between services, ensuring efficient data flow and decoupled architecture.
- Used MySQL as the primary database and maintained code on GitHub for version control and transparency.

### Skills

- ReactJS, Angular, Redux, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS
- Java, J2EE, Spring Boot, RESTful APIs, Microservices, Hibernate/JPA
- Git, GitHub, Postman, Maven/Gradle, VS Code, IntelliJ IDEA, Eclipse
- Object-Oriented Programming (OOPs) MVC Architecture API Integration & JSON handling
- Problem Solving & Debugging , JWT

### Education

Bachelor of Computer Science 70%

July 2024

**Kashi Institute of Technology**

12 – Science with Math 91%

**Dehradun Public School**

Mar 2020
